

Thermodynamic Services

We Care...

Since 1990

ABOUT OUR COMPANY

Thermodynamic Services is promoted by Mr. Sudhir Kumar Jain, Mechanical Engineer of 1983 batch from BITS-Pilani with more than three decades of rich experience and known for his dignity and integrity. With professional approach of the promoter a humble beginning in 1990 has grown to become a well-known and established name in Uttar Pradesh and is known for providing razor sharp solutions in the field of heat energy, compressed air and grain processing.

Over these years, Thermodynamic Services have been associated with leading MNC's like Thermax Limited, Atlas Copco (India) Limited & Bajaj Indef , a one-point professionally managed sales & service channel in Uttar Pradesh that offers full market access, regulatory compliance, highest level of customer support across the U.P. region and always trying to solve the toughest problems, like heat, energy, air, water, solar, grain process, material handling etc.

Thermodynamic Services has a high standard of commitment to quality & follows standard of ISO – 9001-2015 & also received CRISIL Rating of SME-2 which indicates “High” level of creditworthiness, adjudged in relation to other SMEs.

Mission, Vision & Core Values

In a fast changing world, to sustain our growth with core values intact we must understand the changes in social, political and business environment around us and its impact on us. Our vision is to set a roadmap to continuously adapt to the changing realities around us and adopt new methods to achieve immediate as well as long term goals of our business organization.

Our Mission

- *To provide excellent service to our customers every day, every time and to nurture our relationship with them in order to harness mutual strengths for mutual benefit.*
- *To help our customers manage their utility equipment with minimum cost of ownership over it's entire lifecycle.*
- *To continue to offer and add new products and services to our basket which help our customers improve their businesses in terms of better energy efficiency, lesser foot print and to conform to their long term sustainability goals.*
- *To continuously develop, deploy, maintain and upgrade the systems and processes to meet the new challenges offered by ever changing needs of the customers in terms of speed, efficiency and quality.*
- *To invest in human resources and to continuously train and upgrade knowledge and skill levels to ensure organisational as well as personal growth for individuals and in turn ensure quality in all aspects of our operations.*

Our Vision

To be and remain first choice of the customers looking for solutions in the field of heat energy, pollution control, compressed air, material handling or any other product or services which we may add to our portfolio during the course of journey into the future.

Core Values

- **Customers:** Always strive to enhance customer experience in each and every interaction with us at all levels.
- **Partners:** Invest in long term mutually beneficial and respectful relationships with all our associates including suppliers, sub-contractors and principal companies.
- **People:** To be a place to work where people are inspired to give their best, acting as owners, delivering quality each time with passion, integrity, productivity and accountability.
- **Society:** To act and remain as responsible citizens of our country and conduct ourselves in a manner that makes positive impact on lives of people around us.
- **Environment:** To relentlessly pursue the recourse to reduce our carbon foot print by consuming energy judiciously in all our activities, adopt environment friendly practices in our operations and daily life and reduce wastage of precious natural resources like water.
